

Naturally Organic WoolTM

NATURALLY ORGANIC WOOL IS FOR N.O.W AND FOR THE FUTURE

Naturally Organic Wool is completely organically certified, traceable and is the product of many devoted wool growers across the globe.

As environmental awareness and consciousness grows, consumers are looking for better and more eco friendly alternatives when making purchase decisions. As a result, major retailers and apparel brands are looking to support consumer preferences.

Consumers understand the term 'organic'. The food industry have led the way in marketing organic food; successfully educating consumers about the adverse effects of farming with chemicals and the potential health benefits. As a direct result the term organic when applied to food or wool is understood as a healthier moreeco-friendly alternative.

TMC have developed a fully certified organic wool marketing platform to provide major retailers and apparel brands with a reliable and traceable organic product from Sheep to Shelf (S2S).

Naturally Organic Wool is 100% natural, protecting the environment from the use of harsh chemicals and pesticides.

Naturally Organic Wool:

- | | |
|---------------------------|---------------|
| No Hormones | No Steroids |
| No Antibiotics | No GMO's |
| No Pesticides | No Vaccines |
| No Herbicides | No Fungicides |
| No Agricultural Chemicals | |

Naturally Organic Wool is completely organically certified, and is the product of many devoted wool growers across the globe. With regenerative land management and animal friendly practices, these wool growers are dedicated to the ongoing sustainability and health of their land, their sheep and the environment.

Traceability throughout the supply chain from Sheep to Shelf (S2S) is a major factor in ensuring the preservation of the organic status and integrity of products. In addition to supplying certified organic wool, TMC have the highly respected Global Organic Textile Standard (GOTS) certification at one of our key wool top making facilities.

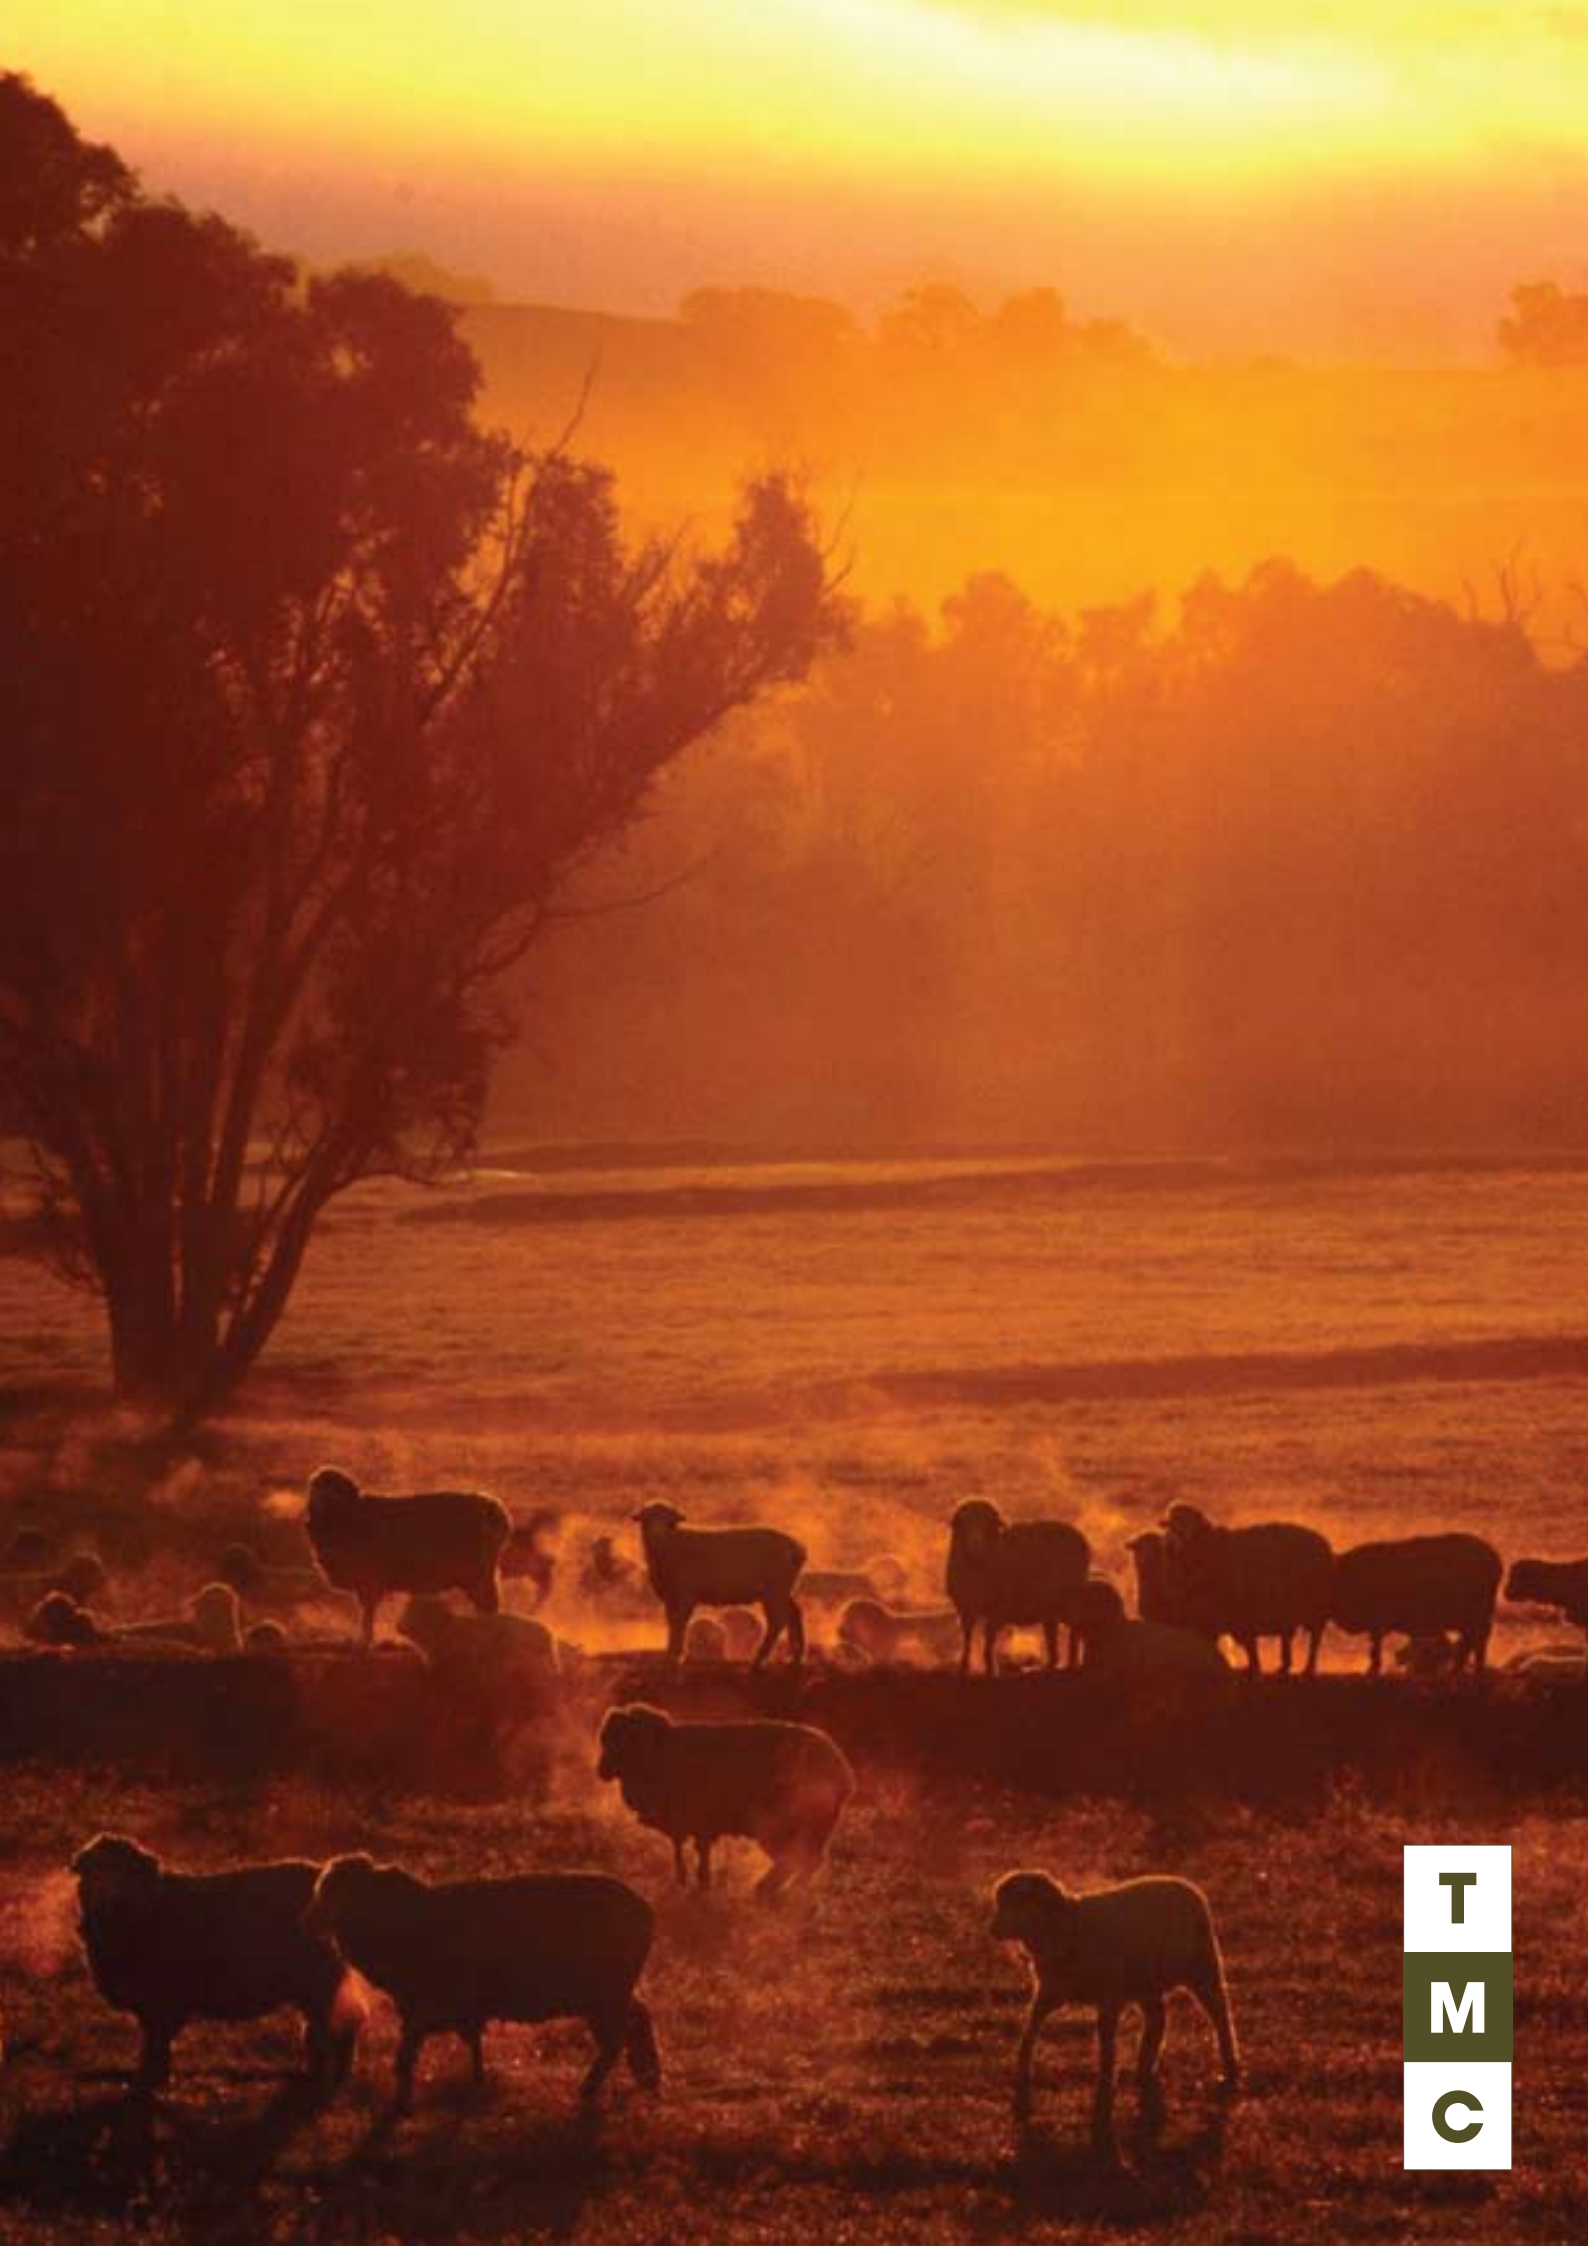

TMC can provide complete traceability throughout the supply chain through the display of farm certification, mill GOTS certification and transaction certificates for each movement of the wool from grower to customer or Sheep to Shelf (S2S).
