It would be no exaggeration to say that businesses have faced more uncertainty over the last three years than at any time in the past decade. During the period under review, business conditions remained challenging with low commodity prices, persistent levels of high inflation and high interest rates. Low economic growth, exacerbated by never-ending loadshedding and weakened consumer confidence, contributed to unpredictable and volatile demand. Pressure on input costs and low natural fibre and livestock prices strained producer profits and business activity for the Group.

With our major restructuring activities now close to completion, the Group is better positioned for the current environment. The Group's full year results for FY24 are expected to be better than those of FY23.

## FINANCIAL AND OPERATIONAL PERFORMANCE

FOR THE SIX MONTHS ENDED 31 DECEMBER 2023.

It is pleasing to report that in a half-year marked by uncertainty, both nationally and internationally, the Group delivered revenue growth of 12.9% (18.3% if discontinued operations are excluded). Revenue increases were primarily driven by significant growth in sales of fuel, seed and fertiliser in our Trading Division. Increased sugar sales by the Atlanta business also significantly contributed to this growth.

The Group generated a net after-tax profit of R9,9 million compared to R0,9 million last year.

### **CONTINUING OPERATIONS**

| ZAR 'millions                        | CURRENT YEAR<br>First Six Months | CHANGE<br>% | PRIOR YEAR<br>First SIX Months |

| EBITDA margin as % of VOB            | 2.5%                             | 0.7pp       | 1.8%                           |
| HEPS (cents)                         | 73.8                             | 67%         | 44.1                           |

The value of business transactions for continuing operations was 2% higher than the prior year at R6,2 billion, while revenue grew 18% to R3 billion. The Group reported an operating profit of R121 million and EBITDA of R152,9 million, compared to R81 million and R107,7 million respectively in the prior year. The Trading and PakHouse Divisions reported exceptional performances, contributing to the overall margin improvement. The Fibre and Livestock Divisions performed below expectations for the half-year as a result of weak local and global demand.

Fibre prices have not yet fully recovered from the effects of the COVID-19 pandemic. The industry view is that wool prices are now at the lower end of a price cycle and are expected to recover. The main contributing factors to the current low prices are the high interest rate and inflationary environments in Europe and the USA, which directly impact demand. Logistical issues at South Africa's ports also adversely affected Pinnacle Fibres. The Fibre Division reported an operating profit of R0,5 million against an operating loss of R2,4 million in the prior year. Prior year sales were severely restricted due to supply chain disruptions following the Chinese ban on importing wool.

The Livestock Division, which includes property sales, experienced extremely difficult trading conditions over the last six months. The overall economic conditions in South Africa squeezed consumer demand which, in turn, directly affected the division's performance. Livestock prices have not recovered as expected as domestic demand for red meat continued to soften. All Southern Hemisphere countries experienced both lower demand and lower year-on-year prices for livestock. Notwithstanding these conditions, the Division reported an operating profit of R16,4 million against R22,9 million in the prior year.

The Group's Trading Division reported operating profit growth of 23.2% to R52,1 million. This was driven by fuel sales volume growth of 22.5%, mainly due to upgrades done at Amersfoort, Cathcart and Burgersdorp. Improved margin management and new direct sales of seed and fertilisers further contributed to the excellent performance. A key project to optimise stock levels is already delivering very good results. The division managed to reduce its average inventory carry period by 12 days and, at the same time, improved stock availability for customers.

Continuing business operations in PakHouse Brands had an excellent first six months, reporting an operating profit of R86,8 million against R48 million in the prior year. Average funds employed in the business reduced from R765 million to R583 million.

Atlanta Sugar, in the Consumer Goods segment, successfully added new product categories (including NuLife low GI sugar) and expanded its customer base, which resulted in a 10.9% increase in sales volumes and improved margins.

The Grains Division performed well. The Bethlehem mill significantly improved efficiencies and increased its capacity, which led to an increase of 23% in tonnage sold. The Grain Storage Division maintained its momentum from the prior year.

During the first half of FY24, we took a disciplined and unflinching approach to cost management. Expenses for the Group's continuing operations for the six months to 31 December 2023 increased 3.8% to R462,7 million. Lower activity in the Livestock and Fibre Divisions helped contain variable costs.

Finance costs increased by R14,1 million to R43,4 million, mainly due to the steadily increasing interest rates prevailing in South Africa. Elevated working capital levels during the period in Pinnacle Fibres and in the newly acquired Provident business within the Trading Division contributed to the higher finance costs.

## FINANCIAL AND OPERATIONAL PERFORMANCE (CONTINUED)

### **DISCONTINUED OPERATIONS**

| ZAR 'millions   | DESERT RAISINS | ALPHAALFA | TOTAL |
|---|----------------|-----------|-------|
| Operational loss  | (27)           | (16)      | (43)  |
| Finance charges   | (18)           | (4)       | (22)  |
| Taxation  | 12             | 5         | 17    |
| Loss from discontinued operations                       | (33)           | (15)      | (48)  |
| Net working capital relating to discontinued operations | 104            | 20        | 124   |

During the past six months, the Board and management continued to implement the actions necessary to exit from non-profitable businesses and restore profitability. Not unexpectedly, losses from discontinued operations had a negative effect on the Group's overall financial performance for the six months to 31 December 2023.

The closure of Desert Raisins is in the final stages. The remaining customer contracts are expected to be completed and delivered by the end of March 2024. Operating losses relate mainly to lower margins resulting from product disposal as part of the cessation of operations.

Following an evaluation of persistent poor performance, the Board approved the full closure of the AlphaAlfa lucerne business. The closure process progressed smoothly. All operating activities ought to be terminated by 31 March 2024.

The closure of Desert Raisins and AlphaAlfa completes the major restructuring of BKB's business portfolio.

### BALANCE SHEET AND CASH FLOW

| Balance sheet and cash flow indicators ZAR 'millions                         | AS AT<br>31 DEC 2023 | CHANGE<br>% | AS AT<br>31 DEC 2022 |
|--|----------------------|-------------|----------------------|
| Net interest bearing debt  | 1 006                | (7.6%)      | 1 089                |
| Net working capital  | 1 239                | (4.2%)      | 1 293                |
| Cash generated from/(utilised in) operations (excluding net working capital) | 48                   |             | (3)                  |

Net debt levels decreased by 7.6% to R1 006 million and should improve further towards the financial year end.

The cash conversion cycle (calculated as net working capital days) improved by 15.4% year on year. The main drivers were the success of the inventory optimisation project in the Trading Division as well as an increase in supplier finance in the Bethlehem mill. Higher holdings of wool stock elevated the working capital requirement of the Fibre Division. This is expected to unwind in the next few months. Working capital of discontinued operations was R124 million on 31 December 2023 and should reduce significantly towards year end.

Trade and other receivables increased 2.1% to R1,1 billion. The current business environment for the Livestock Division has a direct impact on debt collections. Management focuses on tightening credit control discipline to avoid further impairments and write-offs.

Cash generated from operating activities (excluding working capital movements) was R47,6 million compared to cash utilised of R3 million in the prior year.

Capital expenditure on strategic and essential items amounted to R37,5 million (prior period R32,9 million), which was in line with the amount approved by the Board.

Book value of disposals amounted to R8,9 million (prior period R6,5 million).

## OUTLOOK

BKB expects a more favourable second half of the FY24 financial year. The financial impact of restructuring and discontinuing operations will be less in the next six months. The full impact should be through the system well before year end. We expect the Fibre Division to deliver a good set of second half results. The Trading Division and PakHouse Division are expected to maintain the momentum achieved in the first half of the year.

2024 will no doubt be another year of great uncertainty for business. There are a number of current events and risks that might impact global and national markets, livestock prices, commodity prices, input prices, supply chains, and domestic and geopolitical environments. Uncertainty will persist at the very least in the near to medium term given, inter alia, the situation in Ukraine and the Middle East, inflationary pressures in Europe, and the elections later this year in South Africa and the USA. The South African economy is expected to remain fragile throughout 2024. We are hopeful that the high local interest rates will abate in the coming months, bringing much-needed relief to our producers and consumers.

BKB has a portfolio of diverse, cash-generative businesses with market-leading positions. The essential and diversified nature of the Group's core products and services ensures that BKB is able to deal with a volatile and cyclical agricultural sector, and weather any storms that might arise.

Our balance sheet is sound, supported by sufficient liquidity and banking facilities. We have worked hard to ensure that our balance sheet can absorb external shocks while enabling the Group to take advantage of investment opportunities as they arise.

The Group maintains its long-term focus and continues to invest in strengthening its existing operations, renewing the portfolio and developing platforms for long-term growth.

Looking ahead at the next six months:

- The Fibre Division's outlook is positive and should largely replicate the turnaround performance in the second half of the
  prior year. This is supported by recent auction volumes, firmer and improved prices, and a higher volume of wool receipts.
- The Livestock Division is likely to continue experiencing tough trading conditions. Prices are expected to hover around
  current levels with some improvement towards the middle of the year. Interest rate reductions would have a positive effect
  on the division's results.
- The Trading Division's level of activity tends to be lower in the second half of the year. Nonetheless, the positive effects of recent branch upgrades and strategic interventions to improve working capital levels are expected to continue yielding positive outcomes.
- PakHouse Brands' outlook for the second half of the financial year is good. Atlanta Sugar is expected to produce another strong set of results. Likewise, the Bethlehem grit mill is expected to maintain its excellent performance. The Grain Storage Division might be negatively affected by the El Niño cycle, but the impact thus far has been minimal.
- We continue to place great emphasis on uncompromising commitment to and discipline in margin improvement, cost control, capital expenditure and working capital management throughout the Group.

The relationship with our producers, customers and clients remains critical to the success of BKB. We will continue to work closely with producers to ensure that the agricultural sector remains at the forefront of technological and sustainable advancement. All of our people at BKB are committed to providing relevant, innovative, and value-adding services and products.

## **DIRECTORS'** REPO

The condensed consolidated interim results of BKB Limited for the six months ended 31 December 2023 comprise those of the Company, its subsidiaries and jointly controlled entities (together referred to as the Group).

The condensed consolidated interim financial statements of the Group have been prepared in accordance with IAS 34 Interim Financial Reporting, International Financial Reporting Standards ("IFRS"), the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee, the Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council, the listing requirements of the Cape Town Stock Exchange and in the manner required by the Companies Act of South Africa, 2008 (Act 71 of 2008).

These interim results have not been audited or independently reviewed by the Group's external auditors. The condensed consolidated interim financial statements do not include all the information and disclosures required in the annual financial statements and should be read in conjunction with the Group's annual financial statements as at 30 June 2023.

### BASIS OF PREPARATION STATEMENT

The Group's performance is subject to seasonal trends. The Fibre Division generally performs better in the second half of the financial year, but performance is highly dependent on market price fluctuations, exchange rate movements, as well as the timing of fibre received from producers. The Trading Division normally benefits from higher feed sales in the generally drier first half of the financial year.

The reports and commentary which form part of the condensed consolidated financial statements contain forward-looking statements that are subject to risk factors associated with the agricultural industry, many of which are beyond the control of the Group. These forward-looking statements do not constitute a representation and no reliance should be placed on them, although every effort has been made to ensure their reasonableness.

### DIVIDENDS

No dividends were declared for the period.

### RESPONSIBILITIES AND APPROVAL

The preparation of the BKB Group's condensed consolidated interim results for the six months ended 31 December 2023 was supervised by the Group Financial Director, JA van Niekerk.

The Board believes this half-year report is a balanced and appropriate representation of the financial and operational performance of the Group.

The condensed consolidated interim results for the six months ended 31 December 2023 were approved by the Board of Directors on 12 March 2024 and are signed on the Board's behalf by:

Geoff Kingwill

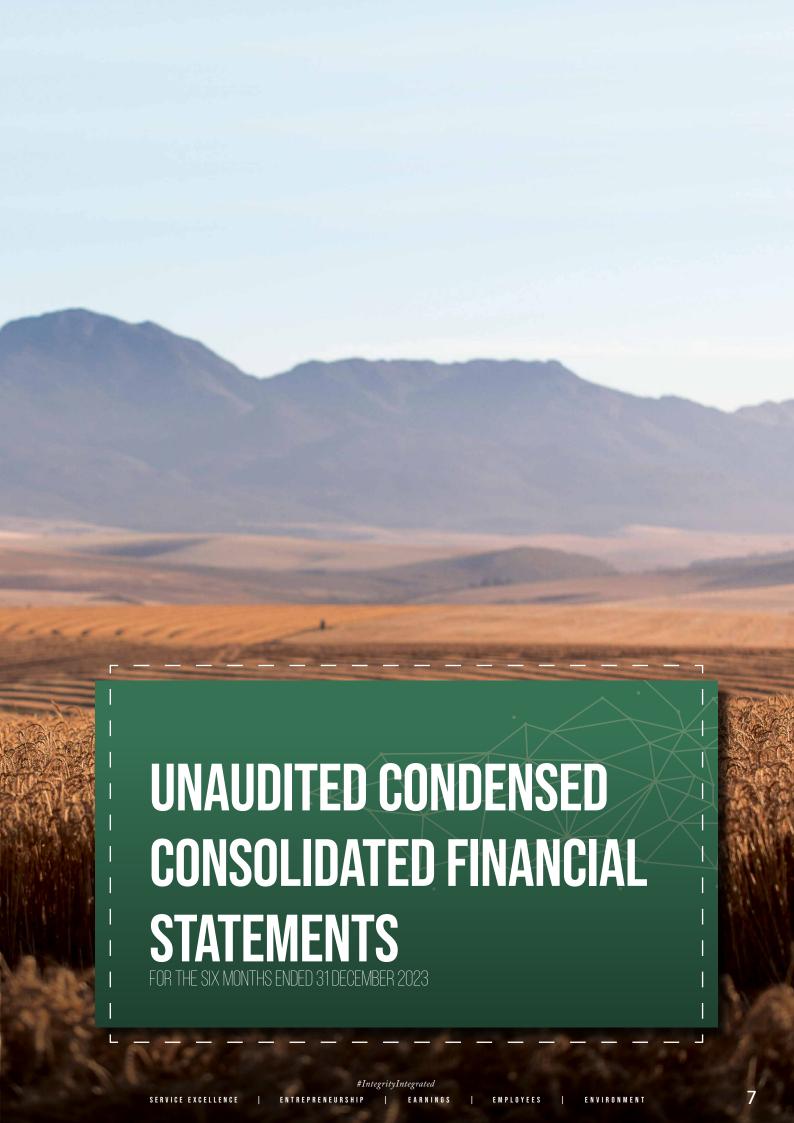

Chairman: BKB Board of Directors

Geoff kingwill

Johan Stumpf Managing Director

Johan Stumpf

The results were made available publicly on 13 March 2024.

(Registration number 1998/012435/06) Interim Results 2024

#### NOTES TO THE FINANCIAL STATEMENTS

#### 1 Basis of preparation

The accounting policies and principles applied in the preparation of the condensed consolidated interim financial statements for the six months ended 31 December 2023 are in all material respects consistent with those applied in the BKB Group's audited consolidated annual financial statements for the year ended 30 June 2023.

#### 2 Segmental information

The Group has identified reportable segments which represent the structure used by the board of directors and executive management to make key strategic and operating decisions and assess performance.

The Group has six reportable segments within which the Group's strategic business units (SBUs) fall.

These reportable segments as well as the products and services from which each of them derive revenue are set out below:

| Reportable segment       | Products and services   |
|--------------------------|---|
| Natural fibre            | Comprises marketing by auction, trading, warehousing and logistics of wool and mohair for both the producer and buyer.                      |
| Retail and fuel          | Comprises retail trading branches throughout the country specializing in agricultural requisites and the supply of fuel.                    |
| Livestock and properties | Comprises the marketing and auctioneering of livestock, general farming implements and agricultural, commercial and residential properties. |
| Leasing of properties    | The leasing of warehouse, office and retail space.  |
| Grains                   | Comprises grain storage and handling and maize milling. The lucerne operations were fully discontinued during the 2024 financial year.      |
| Consumer goods           | Comprises the packaging, distribution and marketing of sugar, dried fruits and agro based consumer goods in                                 |

local and foreign markets. The raisins business was discontinued during the 2023 financial year.

The SBUs offer different services and are managed separately as they require different skills, technology and marketing strategies.

#### Segmental revenue and results

The executive directors assess the performance of the operating segments based on a measure of value of business conducted, revenue, operating profit and profit before tax. The value of business conducted represents the value of sales transactions for the Group as well as those conducted in its capacity as an agent/broker. Income tax is managed on an entity level and is not allocated to the operating segments.

### For the 6 months ended 31 Dec 2023 (Unaudited) Continuing operations

#### **NOTES TO THE FINANCIAL STATEMENTS**

#### 2 Segmental information (continued)

#### Segment assets and liabilities

The amounts provided to the board of directors with respect to total assets are measured in a manner consistent with that of the financial statements. These assets are allocated based on the operations of the segment and the physical location of the asset.

The amounts provided to the board of directors with respect to total liabilities are measured in a manner consistent with that of the financial statements. These liabilities are allocated based on the operations of the segment.

The table below provides information on segment assets and liabilities as well as a reconciliation to total assets and liabilities as per the Statements of Financial Position.

|  |                |             | As at 31 Dec 2023<br>(Unaudited) |                        | As at 31 D             |                        |  |

#### **NOTES TO THE FINANCIAL STATEMENTS**

Summarised statement of profit or loss

#### 3 Discontinued operations

The Board approved the full closure of the AlphaAlfa lucerne business during the six months, following ongoing poor performance. The lucerne press was reclassified as held for sale at the previous year-end. All operating activities should be terminated by 31 March 2024. The assets were reclassified as held for sale at 31 December 2023. This operation forms part of the Grains segment.

The Group decided to discontinue the loss-making Desert Raisins business in Kanoneiland during the previous financial year. The decision includes the sale of the production and ancillary assets of Desert Raisins. These assets were reclassified as held for sale at the previous year-end. The closure is now in its final stages. This operation forms part of the Consumer Goods segment.

The Group made a decision to close and exit the maize meal milling operations at Bultfontein during the previous financial year as the area is no longer a prominent yellow maize growing area. The mill and production assets were sold and activities were ceased during September 2022. These operations formed part of the Grains segment.

The financial performance of these discontinued operations was as follows:
